IMPORTANT : The user of this camera is responsible for checking and complying with local, state, and federal laws and statutes concerning the recording and monitoring of audio signals.

Step 1

The gimbal mount surface mounted to ceiling.

Default position out of the box is for vertical orientation of the camera view.

For horizontal orientation of camera the housing must be opened by removing the 4, M3 button head screws located on each side of the housing.

Camera module rotates 90 degrees in the desired direction.

* The gimbal mount surface mounted vertically.

* The gimbal mount surface mounted horizontally.

Camera module

Open the box and unwrap the camera housing. Remove the top and bottom M6 Allen head screws and separate the gimbal mount from the housing.

Drill a feet-thru hole for the camera cable on the mounting surface.

Step 2

Feed wire through the 3/4" hole on the gimble mount.

For vertical mounting penetrate door frame at 63 inches from the finished floor.

The gimbal can be mounted on the top door jam if required.

Step 3

Center the gimbal mount to mounting surface and mark the mounting holes for the gimbal mount on the surface.

Secure the gimbal mount to the surface using installer supplied self tappers for aluminum frame structure.

If mounting on soft surface such as drywall be sure to use to use anchors.

For drop ceiling tiles it is recommended that toggle bolts be used as anchors.

Step 4

Completing the housing installation

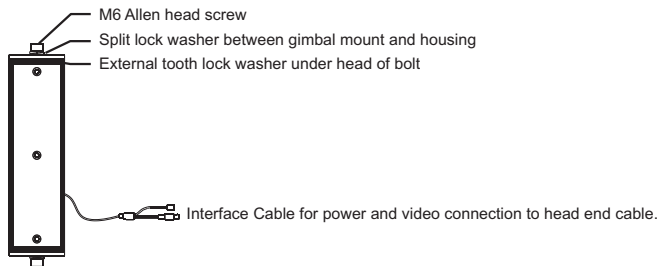

Pull cable from headend thru the mount gimbal mount. Connect BNC connectors and mark power connection to the camera.

Note: Polarities must be observed the camera is 12V DC and damage will result if power polarities are not observed. Power connector has a positive center pin.

Mount the housing to the gimbal using the M6 Allen head screws at the top and bottom.

Place the external tooth washer between the housing and the gimbal mount then the split lock washer on the M6 screw and insert the screw into the housing through the gimbal mount and external tooth lock washer.

Adjust the camera housing right or left to acquire the proper field of view for the installation.

* Camera lens position can be adjusted up and down 5 degrees
